

# Best Practices and Tips for Telework - During COVID-19 and Beyond!

## *A 4-part Webinar Series for Employers, Managers and Employees*

In response to the uncertainties presented by COVID-19, many of us have found ourselves now working from home. Because these are not normal telework conditions, even the most well-prepared companies, with formal telework programs in place, may find that there are challenges to working from home during the pandemic.

### ***This webinar series is for you if:***

- You help support and shape telework policies at your workplace.
- You want to learn how to manage remote workers more effectively.
- You want to learn better telework practices that help improve productivity and wellbeing during the COVID-19 shelter at home orders.
- You want to learn how your company's current COVID-19 telework practices can translate to longer term telecommuting programs that will support your company's bottom line.

The first of the four webinars will start on **Thursday, May 7th from 1 - 2pm (PCT)** while the other 3 webinars are scheduled a week apart through May (May 14th, 21st and 28th from 1 - 2pm PCT). The webinar series is sponsored by The Santa Barbara County Association of Governments (SBCAG) Traffic Solutions, in partnership with the County of Santa Barbara, SLO Regional Rideshare, Ventura County Transportation Commission (VCTC), Transportation Agency for Monterey County (TAMC) and Kern Council of Governments' CommuteKern.

For questions about the survey and webinar series contact Kent Epperson, Director of SBCAG Traffic Solutions at [KEpperson@sbcag.org](mailto:KEpperson@sbcag.org).
