

CELEBRATE EARTH DAY!

**EARTH DAY IS
APRIL 22ND**

In the US and California, transportation is the largest source of greenhouse gas emissions that worsen climate change.

By walking, biking, or traveling without cars, YOU are helping to make the world healthier and safer!

Students:

- Walk to school as many days as you can in April to celebrate Earth Day all month long.

Parents and Caregivers:

- Commit to driving less to protect the world for your child.
- Think about making your daily trips car free.
- Organize a school carpool with other families.
